IBM IBM Tivoli AP Dependency+Discovery Mgr V7.1 Implementation

Practice Exam: 000-011

Exam Number/Code: 000-011

Exam Name: IBM Tivoli AP Dependency+Discovery Mgr V7.1 Implementation

Questions and Answers: 156 Q&As

Exam Description

Order : [000-011 Exam](#)

1. Just4Cert offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-011 Exam.

Just4Cert **Practice Exams** for 000-011 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **IBM certifications I** exam and get your **IBM certifications I Certification**.

We guarantee your success in the first attempt. If you do not pass the **IBM certifications I** "000-011" (IBM Tivoli AP Dependency+Discovery Mgr V7.1 Implementation on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Just4Cert IBM certifications I 000-011 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of IBM certifications I 000-011 exam provides everything which you need to pass your exam. The IBM certifications I Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-011 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first IBM Tivoli AP Dependency+Discovery Mgr V7.1 Implementation(IBM certifications I) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-011 exam.

000-011 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real IBM certifications I exam. 000-011 exam questions updated on regular basis.

Like actual IBM certifications I Certification exams, 000-011 exam preparation is in multiple-choice questions (MCQs) Tested by many real IBM certifications I exams before publishing.

Try free IBM certifications I exam demo before you decide to buy it in <http://www.Just4Cert.com>

High quality and Valued for the 000-011 Exam: 100% Guarantee to Pass Your 000-011 exam and get your IBM certifications I Certification. Come to <http://www.Just4Cert.com> The easiest and quickest way to get your IBM certifications I Certification.

Just4Cert professional provides IBM certifications I 000-011 the newest Q&A, completely covers 000-011 test original topic. With our completed IBM certifications I resources, you will minimize your IBM certifications I cost and be ready

to pass your 000-011 test on Your First Try, 100% Money Back Guarantee included!

000-011 Exam Study Guide

000-011 exam is regarded as one of the most favourite [IBM certifications | Certifications](#). Many IT professionals prefer to add 000-011 exam among their credentials. Just4Cert not only caters you all the information regarding the 000-011 exam but also provides you the excellent 000-011 study guide which makes the certification exam easy for you.

Just4Cert Engine Features

Comprehensive questions and answers about 000-011 exam

000-011 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-011 exam questions updated on regular basis

Same type as the certification exams, 000-011 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-011 exam demo before you decide to buy it in Just4Cert.com

Just4Cert Help You Pass Any IT Exam

[Just4Cert.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-011

Title : IBM Tivoli AP Dependency+Discovery Mgr V7.1 Implementation

1. An anchor server is to be deployed on a Windows 2003 Server.

Which supported Windows SSH software communicates to the IBM Tivoli Application Dependency and Discovery Manager V7.1 server?

- A.WinSSHD only
- B.only WinSSHD or Cygwin
- C.WinSSHD, Cygwin or Putty
- D.WinSSHD, Cygwin or SSHWinClient

Answer: A

2. An IBM Tivoli Application Dependency and Discovery Manager V7.1 server can be installed in many different environments.

Which pre-requisite must be met prior to the installation?

- A.acquire OS hosting preference only
- B.acquire customer application preference
- C.acquire customer hardware and firewall preference
- D.acquire customer hardware and OS hosting preference

Answer: D

3. Where is the Create Custom Server button for the Unknown Servers found?

- A.Inventory Results page
- B.Custom Query Results page
- C.Topology -> Physical Infrastructure pane
- D.Discovered Components -> Application Infrastructure right button selection

Answer: A

4. A customer's IT department may have a preference for the type of database that is used.

What are all of the supported database for IBM Tivoli Application Dependency and Discovery Manager V7.1?

A.DB2 V8.2 and V9.1

B.DB2 V8.2, V9.1 and Oracle V9i, V10g

C.all flat files and relational databases, including DB2 and MySQL

D.DB2 V9.1, Oracle V9i and V10g, and Microsoft SQL Server 2005/2008

Answer: B

5. In a customer network environment, there are two firewalls between the IBM Tivoli Application Dependency and Discovery Manager V7.1 (TADDM) server and the targeted systems. Behind Firewall #1 there are 1000 Computer Systems: 500 Windows 2000 and 500 Windows 2003 Servers. Behind Firewall #2 there are approximately 800 UNIX systems.

What are the two best architecture choices? (Choose two.)

A.Firewall #1: one AIX anchor server

B.Firewall #2: one Windows 2003 anchor server

C.Firewall #1: one Windows 2003 gateway server

D.Firewall #2: no anchor or gateway server is required

E.Firewall #1: one TADDM Domain Server and one Windows 2003 gateway server

Answer: BC

6. A customer has a firewall between 800 Windows Servers and the IBM Tivoli Application Dependency and Discovery Manager V7.1 (TADDM) Domain Server. The customer requires that a single Level 3 discovery run be performed for all 800 Windows Servers at the same time.

Which architecture best meets the customers requirement?

A.a TADDM Domain Server with one Linux anchor server

B.a TADDM Domain Server with one Windows gateway server

C.a TADDM Domain Server with two Windows gateway servers

D.a TADDM Domain Server with one Windows anchor server and one Windows gateway server

Answer: C

7. A customer has a firewall and requires an anchor server. They have a few machines available to use as an anchor server.

What are prerequisites for an anchor server?

A.no requirement needed

B.software requirement only

C.hardware requirement only

D.hardware and software requirement

Answer: D

8. A customer wants to run credential free discoveries using Nmap. There is a firewall between the IBM Tivoli Application Dependency and Discovery Manager V7.1 (TADDM) server and the target machines.

Which operating system combination is valid for the customer?

A.TADDM server and anchor server are on AIX

B.TADDM server on Solaris and anchor server on Linux

C.TADDM server on Linux and anchor server on Windows 2000 Server

D.TADDM server on Windows 2000 Server and anchor server on Linux

Answer: B

9. What information does IBM Tivoli Application Dependency and Discovery Manager V7.1 obtain from Isot?

A.a list of files on UNIX and Linux

B.a list of open connection ports on Cisco devices

C.a list of open files and associated processes on Windows 2003

D.a list of open files and associated processes on UNIX and Linux

Answer: D

10. What is used to change the maximum heap size for all IBM Tivoli Application Dependency and Discovery Manager V7.1 Java applications?

- A. -Xmx
- B. -Xms
- C. -Xmn
- D. -XX:MaxPermSize

Answer: A

11. Which is a required step for configuring an IBM Tivoli Application Dependency and Discovery Manager V7.1 anchor server?

- A. run a discovery
- B. create a gateway server
- C. create an LDAP entry for the anchor server administrator
- D. add access credentials for the anchor server in the Access List

Answer: D

12. How is a community string used by IBM Tivoli Application Dependency and Discovery Manager V7.1?

- A. to authenticate Apache servers
- B. as an access credential for SNMP devices
- C. to access only non-Cisco network devices
- D. as a base value to encrypt passwords in collation.properties

Answer: B

13. What is the recommended maximum number of Configuration Items (CIs) or Computer Systems (CSs) that the domain server can discover and store?

- A. 100,000 CIs or 2500 CSs
- B. 250,000 CIs or 2500 CSs
- C. 2 million CIs or 10,000 CSs
- D. 10 million CIs or 10,000 CSs

Answer: C

14. Which three items must be specified when configuring IBM Tivoli Application Dependency and Discovery Manager V7.1 to authenticate to an LDAP user registry? (Choose three.)

- A. LDIF version
- B. hostname of the LDAP server
- C. the root of the distinguished name
- D. the port number of the LDAP server
- E. root user's password for LINUX or UNIX
- F. the name of the object class used to represent users in LDAP

Answer: BDF

15. Which parameter in the collation.properties forces all modules to at least log at the current level?

- A. com.collation.log.level
- B. com.collation.debuglevel
- C. com.collation.log.level vm.Topology
- D. com.collation.deploy.dynamic.logging

Answer: A

16. A customer is interested in running credential-free discoveries and Nmap is a great optional solution.

Which operating systems can IBM Tivoli Application Dependency and Discovery Manager V7.1 leverage using Nmap?

- A. Nmap on all platforms
- B. Linux, AIX and Windows
- C. Linux, Solaris and Windows

D.Linux, Solaris and AIX with Nmap v3.0

Answer: C

17. What are the two supported browsers and corresponding operating systems for the Product Console and the Domain Manager? (Choose two.)

A.Netscape on UNIX

B.Internet Explorer V7 for Windows

C.Internet Explorer V6 and V7 for Windows

D.Firefox 2.0 for Linux, Solaris, AIX and Windows

E.Firefox 2.0 and Netscape for Linux, Solaris and AIX

Answer: BD

18. What are three reasons to obtain information about the customer's server operating systems from system administrators? (Choose three.)

A.to optimize the logging level

B.to increase database performance

C.to determine the number of firewalls

D.to verify the output of Level 1 discovery

E.to evaluate the need for Windows gateways

F.to start the process to obtain access credentials

Answer: DEF

19. Which statement is true about application descriptor files?

A.Application descriptor files are xml files that need to be deployed by the customer.

B.Application descriptor files automatically find Business Services and will create those Business Services during discovery.

C.There are three different application descriptor file formats, all of which must be discovered during a discovery run before applications will be automatically created.

D.Application descriptor files are xml files for which IBM Tivoli Application Dependency and Discovery Manager V7.1 provides a graphical editor for their creation and deployment.

Answer: A

20. A customer has three data centers with 2500, 3000, 4000 Server Equivalents that need to be discovered. The executives want the ability to view the related Business Applications of the data centers.

What is the minimum architecture requirement?

A.one IBM Tivoli Application Dependency and Discovery Manager V7.1 (TADDM) Domain Server with one anchor server for each data center

B.one TADDM Domain Server for each data center with the ability to synchronize to one TADDM Enterprise Server

C.one TADDM Domain Server to discover all three data centers and synchronize the data back to one TADDM Enterprise Server

D.four TADDM Domain Servers, one domain for each data center with the ability to synchronize back to the main focus point domain server

Answer: B
