

We guarantee your success in the first attempt. If you do not pass the **Certified Specialist** "000-074" (xseries-windows 2000/2003 install+performance optimization on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Just4Cert Certified Specialist 000-074 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of Certified Specialist 000-074 exam provides everything which you need to pass your exam. The Certified Specialist Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "000-074 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first xseries-windows 2000/2003 install+performance optimization(Certified Specialist) exam try, but also save your valuable time.

Comprehensive questions with complete details about 000-074 exam.

000-074 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real Certified Specialist exam. 000-074 exam questions updated on regular basis.

Like actual Certified Specialist Certification exams, 000-074 exam preparation is in multiple-choice questions (MCQs) Tested by many real Certified Specialist exams before publishing.

Try free Certified Specialist exam demo before you decide to buy it in <http://www.Just4Cert.com>

High quality and Valued for the 000-074 Exam: 100% Guarantee to Pass Your 000-074 exam and get your Certified Specialist Certification. Come to <http://www.Just4Cert.com> The easiest and quickest way to get your Certified Specialist Certification.

Just4Cert professional provides Certified Specialist 000-074 the newest Q&A, completely covers 000-074 test original topic. With our completed Certified Specialist resources, you will minimize your Certified Specialist cost and be ready

to pass your 000-074 test on Your First Try, 100% Money Back Guarantee included!

000-074 Exam Study Guide

000-074 exam is regarded as one of the most favourite [Certified Specialist Certifications](#). Many IT professionals prefer to add 000-074 exam among their credentials. Just4Cert not only caters you all the information regarding the 000-074 exam but also provides you the excellent 000-074 study guide which makes the certification exam easy for you.

Just4Cert Engine Features

Comprehensive questions and answers about 000-074 exam

000-074 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-074 exam questions updated on regular basis

Same type as the certification exams, 000-074 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-074 exam demo before you decide to buy it in Just4Cert.com

Just4Cert Help You Pass Any IT Exam

[Just4Cert.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-074

Title : xseries-windows2000/2003 install+performance optimization

1. An administrator discovers a memory leak on one of the company servers. The application responsible for causing the memory leak is mission-critical and cannot be replaced with other software. The problem takes approximately four days to occur; and unfortunately, no patch is currently available. The administrator decides that the best course of action is to reboot the server on a regular basis. Using IBM Director, which of following tools can assist in this task?

- A. Use Software Rejuvenation to schedule a server restart at 1:00 am every third night.
- B. Use Software Rejuvenation to schedule a server restart at 1:00 am every Monday night.
- C. Using the Event Action Plan Wizard, create an action plan to schedule a server restart at 1:00 am every third night
- D. Using the Event Action Plan Builder, create an action plan to schedule a server restart at 1:00 am every other night.

Answer: A

2. An administrator wants to know the serial number of a server that has just been brought online in the network. The IBM Director server is installed and all servers are running the Director agent. Which two of the following actions could the administrator take?

- A. Drag and drop the Asset ID task on to the server in the Groups pane.
- B. Drag and drop the Inventory task on to the server in the Groups pane.
- C. Drag and drop the Asset ID task on to the server in the Group Contents pane.
- D. Drag and drop the Asset Description task on to the server in the Groups pane.
- E. Drag and drop the Inventory task on to the server in the Group Contents pane.

Answer: CE

3. A customer has just installed an RSA II adapter in an IBM eServer x345 server. They have connected the system cable to the host planar and the USB cable to host USB port. When they power up the server, the monitor does not display any video. Which of the following is the most likely cause of the problem?

- A. The USB cable that came with the RSA II is broken.
- B. The customer connected the system cable to the internal video port.
- C. The monitor cable is not connected to the video port on the RSA II adapter.
- D. The RS485 cable between the RSA II and the onboard H8 service processor has not been connected.

Answer: C

4. In a Remote Deployment Manager environment, which of the following tasks should be the first one to run against newly added systems and upon which most RDM tasks are dependent?

- A. Profile Builder
- B. Donor Image
- C. CMOS Update
- D. Scan

Answer: D

5. An administrator would like to check the system health of a large number of servers daily, based on custom thresholds for hardware components. The administrator also needs to generate and save reports directly to a relational database for further analysis. What tool can be used to perform this function within IBM Director?

- A. System Monitor
- B. Capacity Manager
- C. Software Rejuvenation
- D. Remote Deployment Manager

Answer: B

6. Which two of the following options are components of RDM Deployment Server?

- A. Ghost unicast image server
- B. RDM multicast image server
- C. PowerQuest unicast image server
- D. Unicast Trivial File Transfer Protocol (MTFTP) service
- E. Multicast Trivial File Transfer Protocol (MTFTP) service

Answer: CE

7. A company is planning to automate server installations using IBM Remote Deployment Manager (RDM). The server farm is comprised of 20 systems, each with a different hardware configuration. The company has a variety of IBM xSeries server models that will have to run Microsoft Windows Server 2000/2003 operating systems. What can the company do to create an automated install process with minimal effort that will work on all systems?

- A. Use an RDM script to update the latest versions of BIOS, and then run a clone install.
- B. Use RDM's clone install mode to do an imaged install of Windows 2000/2003 operating systems.
- C. Use RDM's native install mode to do a scripted install of Windows 2000/2003 operating systems.
- D. Use an RDM script to update the latest versions of BIOS, then run a full system scan prior to running a clone install.

Answer: C

8. Which of the following commands will be able to scan the hard disk for errors and optionally correct the errors?

- A. CHKDSK
- B. FIXDSK
- C. DEFRAG
- D. SCANDSK

Answer: A

9. Where are hardware conflicts found in Microsoft Windows Server 2003?

- A. Disk Manager
- B. Device Manager
- C. Services Console
- D. Add Hardware under Control Panel

Answer: B

10. A company has an IBM eServer xSeries 365 (with IBM Director Server installed) and an IBM eServer xSeries 345. The administrator properly cables and terminates the ASM interconnect network between the RSA II of the xSeries 365 and the RS-485 ports of the xSeries 345. The two systems are on the same subnet and can ping each other. Microsoft Windows 2003 and all required drivers are installed on both machines. When using the Web browser interface to the RSA II, the ISMP on the xSeries 345 can be accessed. However, when using the MPA task in IBM Director, there is no connection to the ISMP on the xSeries 345. Which of the following steps should the administrator take to resolve the issue?

- A. Use the Communications subtask to configure an IP Address for the ISMP on the xSeries 345.
- B. Install IBM Director Agent on the xSeries 345. Use IBM Director on the xSeries 365 to discover the xSeries 345 and its Service Processor.
- C. Use the Management Processor Assistant to select the xSeries 345 from the xSeries 365.
- D. Uninstall the Service Processor Drivers on the xSeries 345 and then install IBM Director Agent on it. Use IBM Director on the xSeries 365 to discover the xSeries 345 and its Service Processor.

Answer: B

11. Which of the following is a default Hardware Status group in IBM Director?

- A. Hardware Status Alarm
- B. Hardware Status Alert
- C. Hardware Status Information
- D. Hardware Status Predictive Failure Analysis

Answer: C

12. Administrators at a company are building a business case to justify to management the unreliability of the current legacy systems. Using IBM Director, which of the following can be used to prepare pie charts on system downtime?

- A. Remote Session
- B. Capacity Manager
- C. Resource Monitor
- D. System Availability

Answer: D

13. A Web Hosting company provides services to customers within a shared hosting center. They are running multiple customer applications and Web sites on a single server running Microsoft Windows 2003 running IIS 6.0. Through which of the following options can they ensure that one customer application does not affect the others, and effectively share the system resources?

- A. Create multiple Web sites in IIS and System Resource Manager tool to administer system resource usage.
- B. Create multiple Web sites in IIS and run System Workload Optimizer tool to administer system resource usage.
- C. Create multiple application pools in IIS and run System Workload Manager tool to administer system resource usage.
- D. Create multiple application pools in IIS and use System Resource Manager tool to administer system resource usage.

Answer: D

14. An administrator installs Terminal Services on a server running Microsoft Windows Server 2003 and IBM Director. The administrator then successfully logs into the terminal session. Later, when the administrator attempts to log into the server from another workstation, an error message is displayed stating that the user is already logged in. Which of the following actions will allow the administrator to access the Terminal Server?

- A. Install additional IBM Director servers for each session, and install Terminal Services so that each can access their own IBM Director server.
- B. Create additional groups with permissions to log into the terminal server.
- C. Use Terminal Services Licensing tool and change "Restrict each user to one session" to No.
- D. Use Terminal Services configuration tool and change "Restrict each user to one session" to No.

Answer: D

- C. The C2T has taken over the video on the bottom server, rendering the Remote Supervisor Adapter 2 useless.
- D. The Remote Supervisor Adapter 2 has taken over the onboard video on the bottom server, rendering the C2T option useless.

Answer: D
