[Just4Cert.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-530

Title : IBM Internet Security Systems Technical Test

1. What should the SE include as part of a post-deployment plan?

- A. A post-installation training session
- B. A project sign-off lunch
- C. An overview of the possible future direction of the project
- D. The Account Executive takes care of all post-deployment issues

Answer: A

2. In general, a SiteProtector appliance would not be suitable for which type of environment?

- A. Large Enterprise
- B. Small Office
- C. High Alert Volume
- D. Distributed

Answer: B

3. An SE is helping the sales team determine which Proventia Multi-Function Security appliance is the best fit for a client with a maximum of 2,250 users on a 100Mb/sec network segment. Which MFS model should the SE recommend?

- A. MX1004
- B. MX3006
- C. MX5008
- D. MX5110

Answer: D

4. An SE is accompanying the sales team to a sales presentation. The sales team asks the SE to discuss

commercial and open-source vulnerability scanning solutions. What content should the SE include?

- A. Vulnerability scanning tools must be based on high-quality vulnerability research to be most effective.
- B. Commercial tools always check for more vulnerabilities than open source tools.
- C. Open source tools might cause a denial of service during a scan, but commercial products never cause this problem.
- D. Commercial vulnerability scanning tools are faster than open source tools.

Answer: A

5. The X-Force research and development team is primarily concerned with which of the following?

- A. Exploits discovered on the internet
- B. Contracted research
- C. Vulnerability research at IBM ISS
- D. SNORT IDS signature standards

Answer: C

6. Which of the following is the best high-level summary of ISS to present to a management-level audience?

- A. ISS products include network IPS appliances, Multi-Function Security appliances, desktop and server protection, vulnerability assessment, and SiteProtector management.
- B. ISS uses stateful deep-packet inspection and buffer overflow exploit prevention to provide zero-day exploit prevention.
- C. ISS uniquely combines security research, product development, and managed security services to deliver the optimum combination of cost effectiveness and pre-emptive protection.
- D. ISS provides all the capabilities in the Network, Server, and Endpoint component of the IBM Security Framework.

Answer: C

7. Which of the following would be the most appropriate design for a client who requires intrusion detection for an active-active pair of network segments?

- A. A single Proventia Network IPS appliance in passive monitoring mode
- B. A pair of Proventia Network IPS appliances in HA protection mode
- C. A pair of Proventia Network IPS appliances in HA protection mode with power-failure bypass units
- D. A pair of Proventia Network IPS appliances in HA assessment mode

Answer: A

8. During a pre-sales presentation, the client asks the SE to create a basic cost benefit analysis. What should the SE do?

- A. Use the partner pricing guide to define the project costs.
- B. Include pricing in the presentation.
- C. Work with the Account Executive to define the costs.
- D. Include pricing in the presentation but explain that the costs may change.

Answer: C

9. What would happen to traffic that matched a Proventia Network IPS Firewall rule with the action Protect?

- A. It would be dropped.
- B. It would go through the IDS signature policy.
- C. It would trigger alerts only and never be blocked.
- D. It would trigger a DNS lookup for the source IP address.

Answer: B

10. A client requests a GX5108CF demonstration. After receiving the GX5108CF and BYP-2T-2S-0L-P bypass unit, the client calls the SE and explains that the four segments in the network are copper running at 1GBPS. How should the SE respond?

- A. Arrange for 2x (DUAL-TVR-KIT-TX-ROHS) transceiver kits and 1x (BYP-4T-0S-0L-P) bypass units.
- B. Arrange for a Gx5108SFP with 4x (DUAL-TVR-KIT-LX-ROHS) transceiver kits.
- C. Arrange for 4x (DUAL-TVR-KIT-TX-ROHS) transceiver kits (2 kits for NIPS and 2 kits for the bypass unit).

D. Arrange for 4x (DUAL-TV-R-KIT-TX-ROHS) transceiver kits and 1x (BYP-4T-0S-0L-P) bypass units.

Answer: A
