Citrix Implementing Citrix XenServer 5.0

Practice Exam: 1Y0-A09

Exam Number/Code: 1Y0-A09

Exam Name: Implementing Citrix XenServer 5.0

Questions and Answers: 96 Q&As

Exam Description

Order : [1Y0-A09 Exam](#)

1. Just4Cert offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 1Y0-A09 Exam.

Just4Cert **Practice Exams** for 1Y0-A09 are written to the highest standards of technical accuracy, provided by our certified subject matter experts and published authors for development.

3. 100% Guarantee to Pass Your **Citrix Other Certification** exam and get your *Citrix Other Certification Certification*

We guarantee your success in the first attempt. If you do not pass the **Citrix Other Certification** "1Y0-A09" (Implementing Citrix XenServer 5.0 on your first attempt, send us the official result. We will give you a FULLY REFUND of your purchasing fee and send you another same value product for free.

4. Just4Cert Citrix Other Certification 1Y0-A09 Exam Downloadable.

Our PDF or Testing Engine Preparation Material of Citrix Other Certification 1Y0-A09 exam provides everything which you need to pass your exam. The Citrix Other Certification Certification details are researched and produced by our Professional Certification Experts who are constantly using industry experience to produce precise, and logical. You may get "1Y0-A09 exam" questions from different websites or books, but logic is the key. Our Product will help you not only pass in the first Implementing Citrix XenServer 5.0(Citrix Other Certification) exam try, but also save your valuable time.

Comprehensive questions with complete details about 1Y0-A09 exam.

1Y0-A09 exam questions accompanied by exhibits. Verified Answers Researched by Industry Experts and almost 100% correct.

Drag and Drop questions as experienced in the Real Citrix Other Certification exam. 1Y0-A09 exam questions updated on regular basis.

Like actual Citrix Other Certification Certification exams, 1Y0-A09 exam preparation is in multiple-choice questions (MCQs). Tested by many real Citrix Other Certification exams before publishing.

Try free Citrix Other Certification exam demo before you decide to buy it in <http://www.Just4Cert.com>

High quality and Valued for the 1Y0-A09 Exam: 100% Guarantee to Pass Your 1Y0-A09 exam and get your Citrix Other Certification Certification. Come to <http://www.Just4Cert.com> The easiest and quickest way to get your Citrix Other Certification Certification.

Just4Cert professional provides Citrix Other Certification 1Y0-A09 the newest Q&A, completely covers 1Y0-A09 test original topic. With our completed Citrix Other Certification resources, you will minimize your Citrix Other Certification

cost and be ready to pass your 1Y0-A09 test on Your First Try, 100% Money Back Guarantee included!

1Y0-A09 Exam Study Guide

1Y0-A09 exam is regarded as one of the most favourite [Citrix Other Certification Certifications](#). Many IT professionals prefer to add 1Y0-A09 exam among their credentials. Just4Cert not only caters you all the information regarding the 1Y0-A09 exam but also provides you the excellent 1Y0-A09 study guide which makes the certification exam easy for you.

Just4Cert Engine Features

Comprehensive questions and answers about 1Y0-A09 exam

1Y0-A09 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

1Y0-A09 exam questions updated on regular basis

Same type as the certification exams, 1Y0-A09 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Just4Cert Help You Pass Any IT Exam

[Just4Cert.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Citrix 1Y0-A09

Title : Implementing Citrix XenServer 5.0

1. Which two steps must an administrator take to create a Microsoft Windows virtual machine using the XenConvert Physical to Virtual (P2V) conversion tool? (Choose two.)

- A. Modify device drivers
- B. Reboot the physical machine
- C. Run XenConvert on the physical Windows machine
- D. Import the template or image into the XenServer host

Answer: CD

2. What are two best practices for cleaning up a virtual machine after completing a Physical to Virtual (P2V) migration using XenConvert? (Choose two.)

- A. Install XenServer Tools
- B. Delete any local user accounts on the machine that are not in use
- C. Remove and reinstall applications such as antivirus and anti-spyware
- D. Remove any hardware related software such as management utilities and unused drivers

Answer: AD

3. Where can an administrator determine when a XenServer Enterprise Edition 0 license will expire?

- A. XenCenter
- B. XenServer Tools
- C. mycitrix.com web site
- D. Citrix License Management Console

Answer: A

4. What are two differences between a Microsoft Windows virtual machine (VM) installation of the XenServer Tools and

a Linux VM installation of the XenServer Tools? (Choose two.)

- A. The XenServer Tools are pre-installed on a Windows VM but NOT on a Linux VM
- B. The XenServer Tools CD is automatically detected on a Windows VM but must be mounted on a Linux VM
- C. The XenServer Tools do NOT need to be installed on a Linux VM but do need to be installed on a Windows VM
- D. The XenServer Tools are installed on a Linux VM using the command line interface (CLI) but installed on a Windows VM using the GUI installer

Answer: BD

5. According to best practices, which step should an administrator perform before booting the installer CD to upgrade to XenServer Enterprise Edition 5.0 from XenServer 4.x?

- A. Suspend any running virtual machines
- B. Delete the current server configuration
- C. Re-enter the physical network configuration
- D. Backup the existing virtual machines (VMs) with a VM export

Answer: D

6. Which two physical hardware configurations are supported by XenServer Enterprise Edition 5.0? (Choose two.)

- A. 512GB RAM
- B. 256GB RAM
- C. 32 CPU cores
- D. 128 CPU cores
- E. 32-bit architecture
- F. 64-bit architecture

Answer: CF

7. In which three locations could an administrator go within XenCenter to create a new virtual machine? (Choose three.)

- A. VM menu
- B. Tools menu
- C. New VM button
- D. Templates menu
- E. Add New Server button

Answer: ACD

8. Scenario: A company has acquired two small businesses recently. The administrator for the company needs to create a template of a virtual machine (VM) that has Microsoft Exchange running on Microsoft Windows Server 2003. The template will be used to create two more VMs to accommodate the recent business expansion. In which way should the administrator create the template?

- A. Take a regular snapshot of the VM
- B. Create a template using an ISO image
- C. Create a template VM using a Windows Server 2003 Install CD
- D. Take an existing clean Windows Server 2003 VM and turn it into a template

Answer: D

9. Scenario: An organization has a single installation of XenServer Enterprise Edition 4.0. The administrator plans to upgrade the host to version 5.0. Which upgrade path should the administrator take?

- A. Upgrade the XenServer using Emergency Mode
- B. Upgrade directly from version 4.0 to version 5.0
- C. Upgrade to version 4.1 and then upgrade to version 5.0
- D. Upgrade XenCenter to 5.0 and use the Updates Manager

Answer: C

10. Scenario: An administrator is installing XenServer Enterprise Edition 5.0 in an environment. The administrator has two disks available for storage. According to best practices, how should the administrator configure the local disk

storage repositories (SRs) during the initial XenServer installation?

- A. Install XenServer on one disk and the control domain on the other disk
- B. Install XenServer on one disk and the virtual machine SR on the other disk
- C. Install XenServer and an in-place upgrade partition on one disk and the control domain on the other disk
- D. Install XenServer and the virtual machine SR on one disk and an in-place upgrade partition on the other disk

Answer: B

11. An administrator created a template of a Microsoft Windows XP SP3 virtual machine (VM) and now needs to modify it. How can the administrator modify the template?

- A. Power on the VM template, make the changes and save the template
- B. Export the template from the XenServer host, import it to another system, power it on and make the changes
- C. Put the XenServer host in Maintenance Mode, make the changes to the VM template and then exit Maintenance Mode
- D. Create a new VM based on the original template, make the changes to the new VM and turn the new VM into the new template

Answer: D

12. To allow for rapid deployment of XenServer hosts in a large environment, an administrator decides to install XenServer Enterprise Edition 5.0 using a network boot process. To which type of server must the administrator configure DHCP to communicate?

- A. FTP
- B. HTTP
- C. TFTP
- D. HTTPS

Answer: C

13. How much disk space is required for the control domain and guest VM storage repository in a XenServer Enterprise Edition 5.0 installation?

- A. 4 GB
- B. 8 GB
- C. 16 GB
- D. 32 GB

Answer: C

14. Scenario: During the creation of a Microsoft Windows 2003 Standard Edition server virtual machine (VM), an administrator is asked to make as many processors available as possible to allow a developer to test a new multi-cpu application. What is the maximum number of VCPUs that an administrator can assign to this VM?

- A. 2
- B. 4
- C. 8
- D. 16

Answer: B

15. Scenario: An administrator wants to create a new virtual machine (VM) on XenServer1, which does NOT reside in the current resource pool. The administrator wants to keep the configurations exactly the same as those in the resource pool but does NOT want to manually configure the new VM. How can the administrator create the new VM with the same configurations as those in the resource pool?

- A. Copy the VM to a shared storage location and export it to XenServer1
- B. Convert the resource pool VM to a template and start it on XenServer1
- C. Make a backup of the desired VM configurations and save it to a shared storage location before exporting it to XenServer1
- D. Create a custom template of the resource pool VM and import it to XenServer1 then create a new VM from the template on XenServer1

Answer: D
