

4A0-100 Alcatel Lucent

Alcatel Lucent Alcatel-Lucent Scalable IP Networks

Practice Exam: 4A0-100 Exams

Exam Number/Code: 4A0-100

Exam Name: Alcatel-Lucent Scalable IP Networks

Questions and Answers: 180 Q&As

([Alcatel Lucent](#))

Exam : [4A0-100](#)

"Alcatel-Lucent Scalable IP Networks", also known as 4A0-100 exam, is a Alcatel Lucent certification. With the complete collection of questions and answers, TestInside has assembled to take you through 180 Q&As to your 4A0-100 Exam preparation. In the 4A0-100 exam resources, you will cover every field and category in Alcatel Lucent Certification helping to ready you for your successful Alcatel Lucent Certification.

Quality and Value for the 4A0-100 Exam TestInside Practice Exams for Alcatel Lucent **Alcatel Lucent** Certification 4A0-100 are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development.

TestInside provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 4A0-100 Exam.

4A0-100 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Alcatel Lucent product experts, included the current newest 4A0-100 examination questions.

3. 100% Guarantee to Pass Your Alcatel Lucent exam and get your Alcatel Lucent Certification.

If you do not pass the Alcatel Lucent Certification 4A0-100 exam (Alcatel-Lucent Scalable IP Networks) on your first attempt using our TestInside testing engine and pdf file, we will give you a FULL REFUND of your purchasing fee.

use TestInside 4A0-100 Q&A ensure you pass the exam at your first try.

TestInside professional provide Alcatel Lucent 4A0-100 the newest Q&A, completely covers 4A0-100 test original topic. With our complete Alcatel Lucent resources, you will minimize your Alcatel Lucent cost and be ready to pass your 4A0-100 tests on Your First Try, 100% Money Back Guarantee included!

[Alcatel Lucent 4A0-100](#) Test belongs to one of the Alcatel Lucent certified test, if needs to obtain the Alcatel Lucent certificate, you also need to participate in other related test, the details you may visit the [Alcatel Lucent](#) certified topic, in there, you will see all related Alcatel Lucent certified subject of examination.

TestInside Testing Engine Features

Comprehensive questions and answers about 4A0-100 exam

4A0-100 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

4A0-100 exam questions updated on regular basis

Same type as the certification exams, 4A0-100 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 4A0-100 exam demo before you decide to buy it in Test-Inside.com.

Note: This pdf demo do not include the question's picture.

Exam : Alcatel-Lucent 4A0-100

Title : Alcatel-Lucent Scalable IP Networks

1. What is the purpose of carrier sense in the CSMA/CD algorithm?

- A. To ensure the host is able to detect an operational physical link before transmitting.
- B. The host is able to detect the transmission speed of the Ethernet switch port to which the host is connected
- C. The host will only transmit data when it detects that no other devices are transmitting
- D. The host will only transmit upon a timer expiry

Answer: C

2. In what OSPF area type will one see Type 7 LSAs.

- A. Not So Stubby Area (NSSA)
- B. Stub Area
- C. Backbone Area
- D. Normal Area

Answer: A

3. Which of the following are data rates defined for Ethernet operation over copper and fiber optic cabling? (Choose three.)

- A. 1 Mbps
- B. 10 Mbps
- C. 1000 Mbps
- D. 10,000 Mbps

Answer: BCD

4. What is store/forward method of switching frames?

- A. The switch merely looks at the source mac address before switching
- B. The switch looks at the source and destination mac address before switching.
- C. The switch looks at the IP header information before switching
- D. The switch receives the whole frame before switching.

Answer: D

5. Click the Exhibit Button below

An Ethernet Local Area Network (LAN) consists of the components shown in the diagram below:

How many broadcast and collision domains are on this LAN?

- A. 9 broadcast domains, 3 collision domains
- B. 3 broadcast domains, 3 collision domains
- C. 3 broadcast domains, 9 collision domains
- D. 1 broadcast domains, 9 collision domains

Answer: C

6. An Ethernet switch receives a frame addressed to an unknown destination. Assuming the frame is error-free, what will the switch do with the frame?

- A. hold it in a buffer until it learns the port on which the destination is located
- B. flood the frame out all ports except the source port
- C. filter the frame and restrict it only to the source port

D.age out the source address forwarding table entry

Answer: B

7. Which of the following must be true for an Ethernet network to operate in full duplex mode? (Choose two.)

A.dedicated point-to-point connectivity

B.collision detection circuit enabled

C.shared network connectivity

D.collision detection circuit disabled

Answer: AD

8. Which two 7750SR Service Router physical access methods are used to perform Out of Band (OOB) management? (Choose two.)

A.console port

B.management Ethernet port

C.access ports

D.network ports

Answer: AB

9. A distance vector routing protocol uses which metric to choose the preferred route to a destination?

A.bandwidth

B.precedence

C.hop count

D.cost

Answer: C

10. Click the Exhibit Button below

An Ethernet Local Area Network (LAN) consists of the following components:

Four 24-port hubs

Two 16-port switches

How many broadcast domains are on this LAN?

A.1

B.2

C.4

D.16

Answer: A

11. Given a network address of 116.14.0.0, which of the following is a valid host address when using the subnet mask 255.255.255.240?

A.116.14.17.16

B.116.14.17.31

C.116.14.17.192

D.116.14.17.189

Answer: D

12. What is the network layer responsible for?

A.Providing the physical address to the packet.

B.Determining the path to the remote host.

C.Providing reliable communications from host to host.

D.Formatting the PDU.

Answer: B

13. The Media Access Control (MAC) sub-layer is responsible for which two functions? (Choose two.)

A.directly interface with the transport layer

- B.link integrity testing
- C.physical addressing
- D.data transmission synchronization

Answer: CD

14. Which of the following are phases of PPP operation? Choose two.

- A.Link establishment
- B.Authentication
- C. Window size negotiation
- D.Routing

Answer: AB

15. Click the Exhibit Button below

A customers Ethernet network consists of the following:

The diagram shows:

Four 24-port hubs for user connectivity

Three contact management database servers

A 60-port Fast Ethernet switch

Dedicated Ethernet connections for each of the hubs and the database servers on the Fast Ethernet switch

Which two of the following statements concerning this networks operation are true? (Choose two.)

- A.the clients operate in full-duplex mode
- B.there will be no collisions between client devices
- C.collisions will occur between client devices
- D.the server connections operate in full-duplex mode

Answer: CD

16. Which Ethernet frame field does the receiver use to verify the integrity of the received bits?

- A.Destination address
- B.Frame check sequence
- C.Preamble sequence
- D.Length field

Answer: B

17. Which Ethernet frame fields are not considered when calculating the frame size? (Choose two.)

- A.Frame check sequence
- B.Preamble
- C.Virtual Local Area Network (VLAN) tag
- D.Start of frame delimiter

Answer: BD

18. Which ATM adaptation layer is usually used for transporting IP datagrams?

- A.AAL1
- B.AAL2
- C. AAL 3
- D.AAL 5

Answer: D

19. Which of the following are basic router functions ? Choose two.

- A.Perform a Layer 2 header lookup
- B.Broadcast a Layer 2 packet to all the interfaces.
- C.IP header examination.
- D.Determine the best path to the destination.

Answer: CD
